## LAKE SEMINOLE SQUARE Seminole, Florida

We sold the land to a developer who built the 339 bed facility. There were three parcels of land facing Lake Seminole owned by three different entities that didn't speak to each other because each accused the other of dumping garbage on their land.

Florida Growth Realty was able to obtain the representation from all three parties to sell the land, which he did to the group who built Lake Seminole Square.

The success we achieved here can also be used to develop a success for you, our future client.
